

Aluminum Muffler Maintenance

Aluminum corrodes when it comes in contact with dust, mud and road salt.

To remove stains, use Scotch Brite Hand Pad #7447 (maroon) or equivalent.

Wet the pad and polish the surface using strokes parallel to the length of the muffler.

Clean the muffler using a wet sponge and a mild detergent, then rinse well with clean water.

Dry the muffler with a soft clean cloth, using strokes parallel to the length of the muffler.

CAUTION:

- * Avoid using steel wool, polishing compounds, or wax on an aluminum muffler. Steel wool may damage or discolour the surface. A polishing compound or wax may discolour the surface after its heated by engine operation.**
- * Muffler Stain Remover (Scotch Brite Hand Pad #7447) is for removing stains on the aluminum mufflers only.**
- * Protect the muffler before you apply any chemical detergent to clean your rear wheel. Chemical products accidentally applied to the muffler may damage the surface of it.**
